

Prototype Objectives and Questions								
Traener								
Updated: June 25, 2019								
Below are several objectives to be achieved and questions to be answered during the prototype phase.								
General								
Will coaches participate in and gain value from coaching in a remote, digital format								
What are the key program features required for success								
What are the key technical features required for success								
Should the program be more freeform or highly structured								
In what environments would surgeons and coaches use the platform, e.g. mobile for this, desktop for that								
Goal Setting								
What do coachees most want to be coached on								
How should goal setting work								
Sharing								
What is needed for successful case information sharing								
What types of materials would surgeons and coaches want to share								
How would they like to comment on or leverage those materials								
Coaching								
What is the optimal coaching session format, frequency, and length								
What feedback should be tracked and in what form								
What makes for a good digital coach								
Tracking								
How should goal tracking work								
What activity should be captured
